

# U.S. Highway 41 Corridor Improvements

## Project Fact Sheet

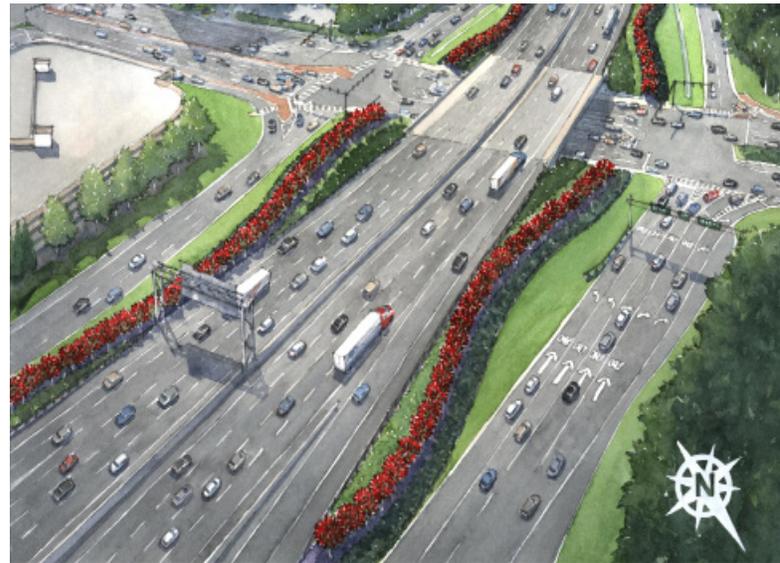

### CONSTRUCTION TIMELINE

### PROJECT OVERVIEW

US Highway 41, known locally as Cobb Parkway, is the main artery for Cobb County's central business district. Stretching from Michigan to Miami, this stretch of asphalt proves vital for Cobb's success. The improvements for U.S. Highway 41 include bridge widening, road widening to three lanes in each direction, plus additional turn lanes and medians.

- The project also includes a 12-foot-wide multi-use trail throughout the corridor, bridging the regional trail connections between communities west of Cobb County as well as the City of Atlanta.
- This project will also provide landscape enhancements that will soften and beautify the active corridor.
- The project will result in multiple long-term benefits for the area including safer traffic flow, greater capacity, and improved connectivity between Cobb and Fulton counties.

### FINANCIALS

**Total Project Cost = \$60 million**

#### Funding Sources

Cumberland CID = \$8 million

Federal / GDOT = \$50 million

ARC = \$1.5 million

Cobb County = \$212K
