

Windy Hill Corridor Improvements

Project Fact Sheet

CONSTRUCTION TIMELINE

PROJECT OVERVIEW

Windy Hill Road is a major artery connecting West Cobb to Cumberland, the county's largest business district. The East and West Corridor Improvements will focus on Windy Hill Road from Cobb Parkway to Powers Ferry Road.

- This portion of the improvements will include road widening to handle additional capacity and new medians for safer travel.
- Improvements are needed along this corridor because it experiences crashes at a rate three times greater than state-wide averages; injury rates are double the state rates, according to a 2010 report.
- The interchange at Interstate 75, will be reconfigured into a Diverging Diamond Interchange, eliminating the left hand turns at traffic signals and improving vehicular flow without the addition of extra lanes. It will also include a bridgescape feature.

FINANCIALS

Total Project Cost = \$46.4 million

Funding Sources

- CID - \$7 million
- Cobb County - \$25 million
- State - \$3.4 million
- Federal - \$11 million
